COMPANY PROFILE

Establishment time: August 30, 2020

ALLCONNECTOR LTD. is a high-tech industrial chain company that provides comprehensive solutions and supply chains for global electrical equipment manufacturers. It distributes multiple connector brands and always adheres to the customer-oriented approach, the business philosophy of "only producing original and authentic products", and the responsibility of connecting cutting-edge technology and serving global intelligent manufacturing. The company is committed to providing high-quality products and reasonable prices to serve customers, creating common interests. With a continuous improvement attitude, the company will provide high-quality and reliable connector products for domestic and foreign customers.

Corporate Culture

Core Values

Customer orientation, emphasis on talent, innovation for strength, win-win cooperation, and giving back to society

Business Philosophy

Take advantage of the situation |

Shaped for you

Quality Policy

Building a competitive quality management system

QUALITY POLICY

Always focus on the future,
challenge dreams and possibilities

Service Area

Automobile Industry

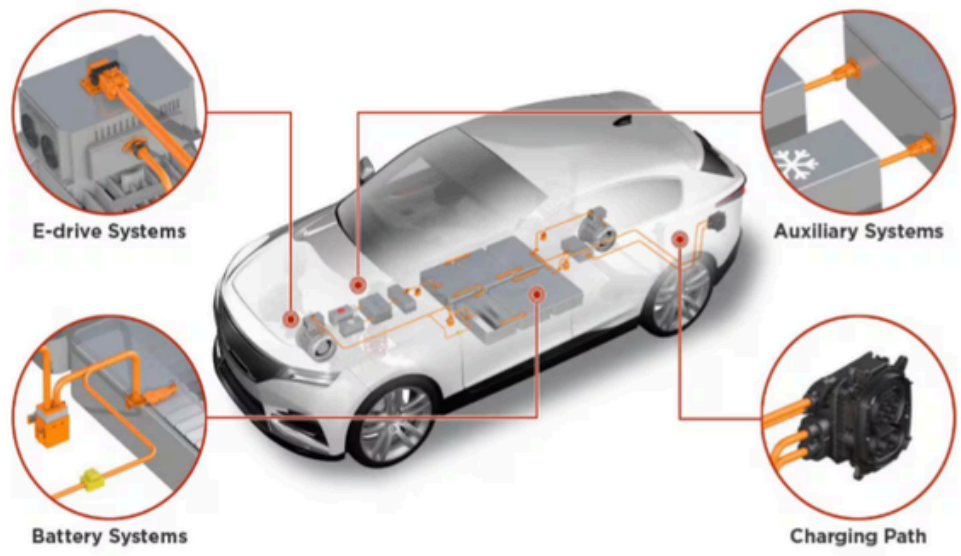

Service content: Provide comprehensive connector solutions for the automotive industry, including electric vehicles, in car entertainment systems, sensors, etc., to help car manufacturers improve the intelligence and reliability of their products.

Industrial Sector

Service content: In the industrial field, we provide high-performance connectors for robots, automated production lines, etc., ensuring stable operation and efficient production of equipment, and promoting the development of industrial automation.

Medical Field

Service content: Provide high-precision connectors for medical equipment manufacturers, applied in diagnostic equipment, treatment equipment, etc., to ensure the accuracy and safety of medical equipment and contribute to the development of the medical industry.

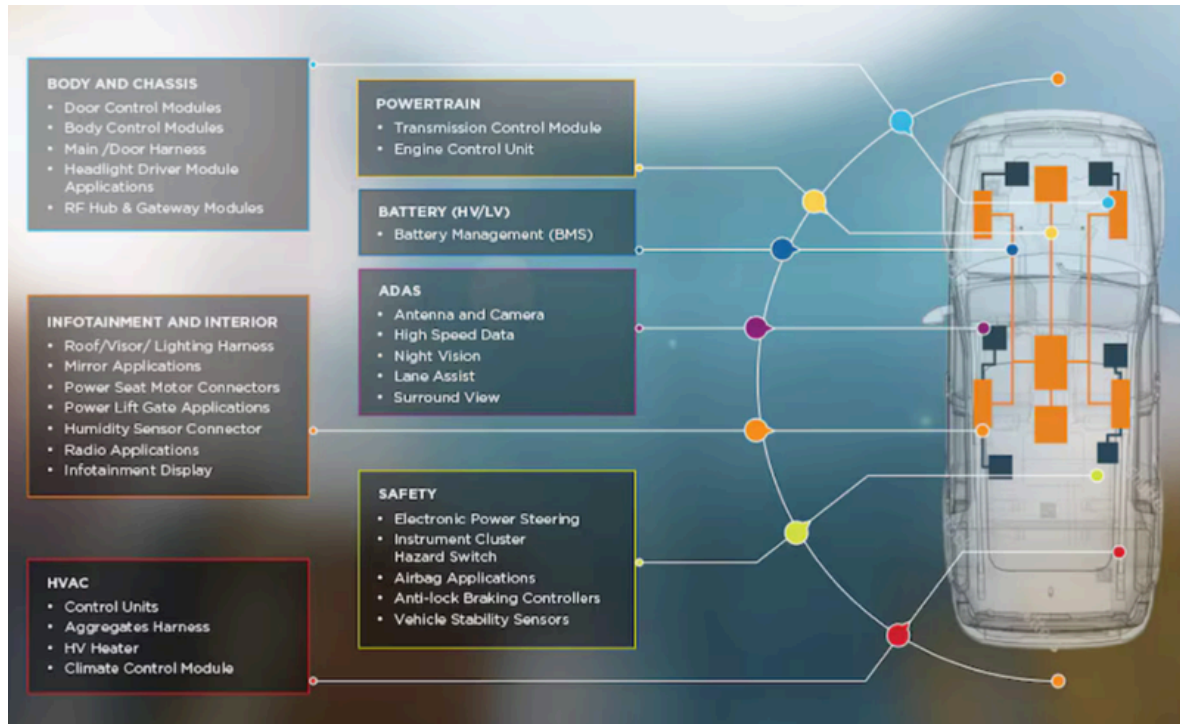

Product Application

Electric Vehicle

Electric vehicles have become mainstream, providing faster acceleration, instantaneous torque, and improved driving experience. But the complexity of electrification also makes the product itself more complex. We collaborate with multiple connector brands worldwide to build high-voltage connection solutions. Our products cover the entire range of energy transmission for electric vehicles, providing safe, reliable, durable, and efficient electrical system connections that can meet the higher rated power and thermal and vibration requirements of design engineers.

E-drive Systems							
Auxiliary Systems							
Charging Path							
Battery Pack							

Product Application

Miniaturized Car

The miniaturized car connection system meets or even exceeds customers' requirements for primary and secondary locks, while reducing space capacity by up to 50%, shell weight, and packaging space by up to 55%. From alternative power systems to data connectivity and sensor technology, capable of withstanding high temperatures, vibrations, impacts, pressures, and long lifetimes of electronic control systems.

Product Application

Racing Car

Professional racing products can help customers improve the energy and information transmission performance of their machines as much as possible, providing reliable performance on racing tracks in harsh technical environments and helping them win in competition. Helping to cope with the performance challenges that racing teams face every weekend on the track, whether it's asphalt or dirt tracks, they can handle them with ease. The DEUTSCH racing and Raychem product lines offer carefully designed high-performance wires, heat shrink tubing, and protective covers, setting global standards for racing interconnect solutions and helping top teams achieve victory.

Product Application

Commercial and Industrial Vehicles

From battery disconnect switches and emergency stop switches to power relays, KISLING's product line includes a wide selection of sealed and professional switch solutions, with a development history spanning over 70 years and robustness built into every design. Durable terminal and connector products developed for harsh application environments. It has been proven that the KISLING product portfolio can seamlessly support various vehicles and equipment in fields such as construction machinery, agriculture and commercial transportation, as well as defense, aviation, railways, etc., ready to respond to extreme situations at any time.

Creating a One-stop Automotive Connector Service

Purchase Service

①

Recommend suitable automotive parts based on customer needs, provide detailed product information, prices, and inventory status.

②

Quality Inspection

Quality inspection and safety assessment of automotive spare parts.

After-sale Service

③

There is quality assurance, and any product issues are handled through after-sales service. The service process is open and transparent.

Competitive Edge

Sufficient Stock

We have abundant connector inventory from multiple industry-leading manufacturers and are committed to providing high-quality products on time and accurately.g position.

Professional Team

Provide you with customized supply chain solutions that meet your needs as soon as possible

Agile and Resilient

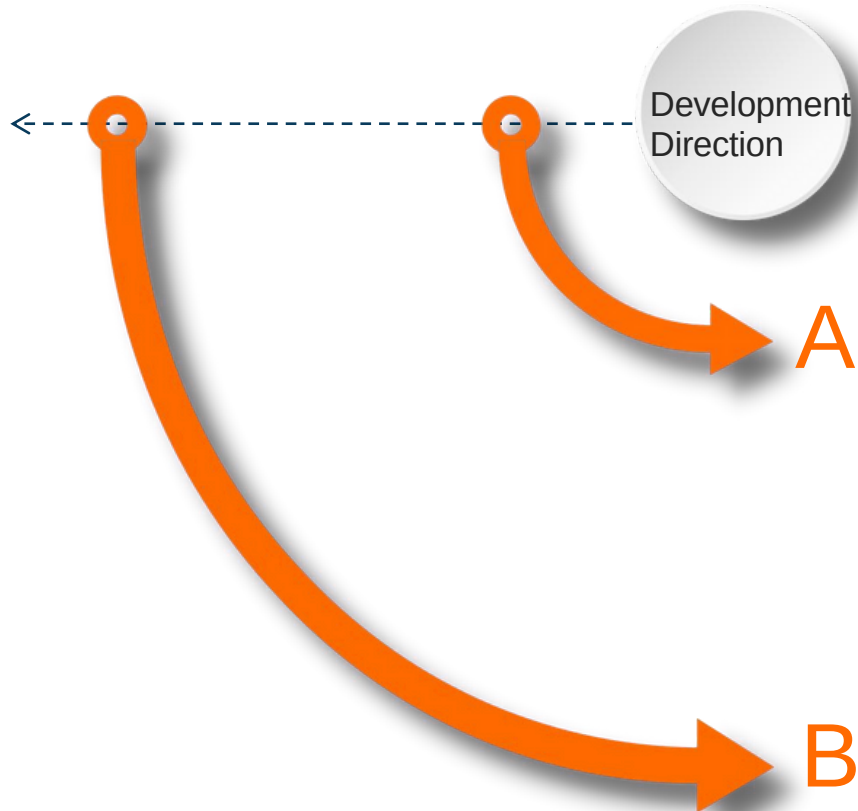

Flexible services can quickly adapt to the needs of different customers, break free from fixed patterns, and creatively solve problems. To meet the expectations of different customers.

Quick Response

We promise to respond promptly to customer inquiries, solve problems encountered by customers in a timely manner, and ensure that customers have no worries during use.

Future Plans

Continuous Innovation

We will continue to invest in research and development, collaborate with top global manufacturers, and continuously launch innovative connector products to meet the market's demand for high-performance connectors and promote technological progress in the industry.

Global Layout

We will continue to expand our global market, optimize our supply chain layout, improve service efficiency, and strive to become a leading global connector solution provider, contributing to the development of the global manufacturing industry.

THANKS

Year after year, our customers have rated our inventory supply, on-time delivery, and accuracy as top performers in the industry. Please call us to learn more about the reasons for choosing us.

**Always focus on the future, challenge
dreams and possibilities**
